Using *LE CYLINDER* **for the first time :** (see figure 2)

a) Remove the watch holder (1) by unclipping it in line with LE CYLINDER.

b) Using the special tool provided (2), unscrew the central screw (3) as shown.

c) Remove the cover (4).

d) Insert 4 AA lithium/alkaline 1.5V (LR6) batteries in the housings (5), respecting the polarity
   (Check the markings on the battery housings.)

e) Replace the cover (4) carefully.

f) Replace the central screw using the special tool.

g) Ensure that LE CYLINDER turns freely.

h) Press the button on the front to ensure that the device is charged and to start the cycle.
   (N.B. The cycle will only begin if there is a watch on the watch holder)

Charge : The light flashes to indicate the level of charge.

4x   Fully charged

3x   > 60% charge

2x   > 30% charge

1x   **Replace the batteries !**

LE CYLINDER is supplied pre-configured, meaning that in the majority of cases it is operational without the user needing to change any settings.

The pre-defined cycle is set as follows :

- 8 turns anti-clockwise
- 8 turns clockwise
- 15 minute wait
- 8 turns anti-clockwise
- 8 turns clockwise
